CONFERENCE CHAIR MESSAGE

||| **Ghassan G. Abulfaraj**
Conference Chair

Dignitaries, Committee Members, Esteemed Colleagues

I am delighted to welcome such a distinguished group of stakeholders to the ASSP Professional Development Conference and Exhibition, in the beautiful Kingdom of Bahrain.

Driven by a theme of “Sustaining HSE Excellence,” this event allows us a unique opportunity to leverage off some of the world’s foremost thinkers, professionals, and subject matter experts across a wide range of disciplines. As we emerge from the challenges of the past few years, we are once again able to gather in person.

This year we welcome a number of outstanding dignitaries, storytellers and keynote speakers for what promises to be an event to remember. Specifically focused on information on the latest trends, lessons learned, case studies and best practices in workplace safety, this will prove to be a valuable platform for us all in terms of our journey towards safety excellence.

Our agenda allows all of us the opportunity to learn, reflect and be inspired, while our sessions include numerous panel discussions and technical workshops. I encourage all of you to not only discuss our successes, but also spend time exploring potential solutions to the important challenges being faced by our sector today.

During this conference, we will delve into a full spectrum of topics affecting the modern realm of HSE. We will cover everything from the importance of safety leadership to safety on the construction site, the psychology of safety to digitalization, and of course – the value of diversity when looking to build an effective safety culture.

We are all focused on not only seeking, but indeed sustaining, excellence in terms of our HSE efforts. I invite all of you to participate – learn, ask questions, challenge the status quo, and most importantly action the lessons learned to make your respective organization safer.

I look forward to your participation,

CONFERENCE DIGNITARIES

Aali Al Zahrani
Sr. VP Safety and Industrial
Security
Aramco

Abdulkarim Al Ghamdi
Sr. VP Project Management

PANEL DISCUSSIONS

1. Safety Leadership

Safety Leadership is a key component in a successful safety culture, all staff, from employees to managers and directors are involved and feel responsible for safety, whatever their level in the organization. The Panel discussion will discuss key roles and responsibilities for safety leaders to influence workers to be fully committed to each organization's safety value including:

- Sharing best practices on how to achieve world-class safety.
- Offering insights into how to develop and sustain a safety culture.
- Discussing how to ensure that safety is effectively communicated, understood and embraced by all employees within the organization.
- The role of safety leadership and its positive impact to the safety culture of the organization.

Ma'aden

Majed Alfawaiz
Secretary General

National Council of
Occupational Safety &
Health

Moderator

Laila Al-Hmoud
Division Head of Upstream Digital
Architecture & Technology
Aramco

PANEL DISCUSSIONS

2. Building & Construction Safety

The panel will discuss safety in built projects from codes and standards in design stages to safety at construction sites:

- Why are codes and standards important and how can they influence projects.
- How does building safety regulations differ around the world?
- Changes in codes, why they happen and how to enforce them.
- Best practices in managing and monitoring contractors dispersed in different sites.
- The most common hazards in construction sites.

Keynote Speaker

Abdulkarim Al Ghamdi
Sr. VP Project Management
Aramco

Panelist

Judy Zakreski
Senior Vice President
International Code Council

Murad Sayed
VP PM
Aramco

Ian Cooke

SABIC

PANEL DISCUSSIONS

3. Digitilization in Safety

Safety, like many other fields, stands to benefit greatly from the digital transformation. The panel will discuss this transformation and how it could improve safety processes, performance, and culture. The discussion will explore topics of interest in digitalization such as:

- Safety Digitalization Applications
- Automation of safety processes such as HAZOP, Risk Assessment, and Incident Management
- Big Data Applications in Safety
- Improving safety training using Virtual Reality (VR)

Keynote Speaker

Basil Al Dossary
CEO
Takamul

Panelist

Tony Downes
Principal
Downes Process
Safety

Prof. Joan Cordiner
HOD of Chemical
& Biological
Engineering
The University of
Sheffield

Hosam Al Jalal
VP PM

Erik Talley
Director, Health,
Safety, and
Environment
KAUST

Moderator

Saad Al-Twaim
Ma'aden

PANEL DISCUSSIONS

4. Psychology in Safety

The panel will discuss the role of human psychology in system safety. In other words, how systems can be designed, operated and maintained to ensure optimal human reliability. The discussion will explore topics of interest in human and organizational factors such as:

- Recent research findings about human performance issues and tested solutions to overcome them
- How to integrate human and organization factors in oil and gas facilities
- Proven tools and methods used in industry to incorporate human factors
- The role of safety culture, safety leadership and its core principles such as psychological safety to positive safety behavior and improved performance

Keynote Speaker

Dr. S. Camille Peres
Associate Professor
Texas A&M University

Panelist
